Live Re-login close time	16:30 hrs

The procedure for downloading the files for participating in mock trading is specified in Annexure. The Exchange plans to implement the Self Match Prevention Functionality (SMPF) which prevents order matching between a buy order and a sell order entered by member(s) for the same client in the same order book. In SMPF, the system will restrict to match counter side order which is initiated from same Permanent Account Number (PAN). The system will reject the counter side passive order existing already and will be applicable to Non-institutional and Proprietary (PRO) orders. The SMPF will be applicable in case of limit, market and triggered stop loss orders in pre-Open, Call Auction, Normal and Post-Close sessions.

Members may note that the trades resulting from such mock trading will not attract any obligation in terms of funds and/or securities, pay-in and/or pay-out, and do not create any rights and liability on members. My²Exchange facility will not be available during mock trading and same would be available after live re-login session.

Members having approved algorithmic software are required to mandatorily participate in mock trading session using all User Ids approved for Algo trading, irrespective of the algorithm having undergone change
